BECAUSE  
**DOWNTIME**  
 ISN'T A  
**GOOD TIME**

## PROTECT YOUR DATA FROM WORST CASE SCENARIOS

You already protect your business against worst-case scenarios. Why not your data? DataWise™ creates a secure off-site backup of your point of sale data. We hope you never experience fire, theft, a natural disaster, or a computer system failure. But if you do, we'll get you back on your feet in no time.

**DataWise™**

Don't leave your business vulnerable to the unexpected.  
 Protect your data with DataWise™.

**Auto Backup.** The backup takes place automatically after hours, seven days a week. Nothing to manage or remember.

**Auto Save.** Your point of sale data is safe on our professionally managed in-house servers — secured until you need it.

**Quick Recovery.** If disaster strikes, your data will be recovered in no time. Get your business up and running again quickly.

**Instant Set-up.** Honestly, there is no set-up. Once you purchase DataWise™ on the webstore, you're done and ready to go!

*"... a company that experiences a computer outage lasting for more than 10 days will never fully recover financially and 50% of companies suffering such a predicament will be out of business within five years."*

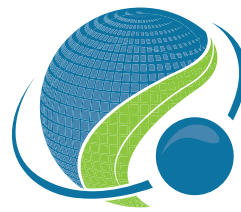

David M. Smith, PhD - Graziadio School of Business and Management
