

Trend Micro & Paladin POS

Protect your business

Keep your system safe and secure.

When you access the internet, your information is at risk. Small businesses are increasingly targeted in today's world. According to Trend Micro, hackers are targeting businesses comprised of 1 - 125 employees with more intensity each year. In 2012, small businesses "accounted for up to 36% of the data breaches¹." What does this mean for your store? It's time to secure your system and prevent cyber-attacks.

Overview

Trend Micro "develops Internet content security and threat management solutions that make the world safe for businesses and consumer to exchange digital information²." With over 20 years of experience in keeping businesses safe from online threats, Trend Micro is "recognized as the market leader in server security²" and is Paladin's choice for system security.

Do you need protection from hackers? The answer is a vehement yes. "Over 90% of organizations have active malware, yet more than half are not aware of these intrusions³." Don't be one of the organizations that take the blow. Be confident: your store information is safe.

Features and Benefits

According to Trend Micro, "one new threat is created every second of every day³." With so many attackers searching for information, it's time to clamp down on security. Trend Micro software defends your data and all other store information. Minimize your risk with antivirus software that anticipates new threat trends and is simple to manage³.

Paladin offers a free year of subscription to Trend Micro with every new Paladin POS terminal. Working with Trend Micro makes Paladin POS a stronghold, keeping your information safe from outside threats.

The Paladin Advantage:

- Real-time protection against viruses and outside threats
- One free year of Trend Micro offered with Paladin POS terminal purchase
